

Chapter 1: Computer System

1. Which fraction of a second is equivalent to one millionth of a second?

- (a) Milliseconds
- (b) Microsecond
- (c) Nanosecond
- (d) Picoseconds

2. Incorrect input results in incorrect output. It is referred to as

- (a) FIFO
- (b) LIFO
- (c) GIGO
- (d) None of the above

3. How many kilobytes are in one megabyte?

- (a) 1030
- (b) 1000
- (c) 1048
- (d) 1024

4. Repeatedly working capability of computers is known as

- (a) Storage
- (b) Speed
- (c) Diligence
- (d) Versatility

5. What is the primary function of the CPU in a computer system?

- (a) Memory storage
- (b) Data input
- (c) Arithmetic and logic operations
- (d) Graphics rendering

6. Which of the following is a volatile memory in a computer system?

- (a) Hard Disk Drive (HDD)
- (b) Random Access Memory (RAM)
- (c) Solid State Drive (SSD)
- (d) Cache Memory

7. What does the term "BIOS" stand for in a computer system?

- (a) Basic Input Output System
- (b) Binary Input Output System
- (c) Base Input Output Software
- (d) Basic Integrated Operating System

8. Which of the following is a secondary storage device?

- (a) RAM
- (b) CPU
- (c) USB Flash Drive
- (d) Cache Memory

9. What is the role of the motherboard in a computer system?

- (a) Manage power supply
- (b) Connect all hardware components and provide communication between them
- (c) Execute software applications
- (d) Store data permanently

10. What is the purpose of an operating system in a computer system?

- (a) Manage hardware resources and provide a user interface
- (b) Perform complex mathematical calculations
- (c) Store and retrieve data
- (d) Display graphics on the screen

11. Which type of software is designed to perform a specific task, such as word processing or spreadsheet calculations?

- (a) System software
- (b) Application software
- (c) Utility software
- (d) Firmware

12. What is software?

- (a) A physical part of the computer
- (b) Instructions that tell a computer what to do
- (c) A type of input device
- (d) A tool for cleaning computer hardware

13. Which of the following is an example of application software?

- (a) Microsoft Word

- (b) CPU
- (c) Hard Drive
- (d) RAM

14. Which of the following is the tangible part of a computer?

- (a) Software
- (b) Freeware
- (c) Hardware
- (d) Firmware

15. Which of the following devices would you use to transfer a file from one computer to another?

- (a) Hard disk
- (b) Mouse
- (c) Pen drive
- (d) RAM

16. The wheel of the mouse helps to scroll the page:

- (a) Up-down
- (b) Left-right
- (c) Both (a) and (b)
- (d) None of these

17. Which memory is located closest to the CPU for quick access?

- (a) Cache memory
- (b) Virtual memory
- (c) ROM
- (d) Cloud storage

18. Which operating system is an example of multi-user OS?

- (a) Windows 95
- (b) Linux
- (c) Palm OS
- (d) Android

19. In which device you get in-built keyboard:

- (a) Laptop
- (b) Mobile phone
- (c) Tablet
- (d) All of the above

20. 3D printers create objects using which technology:

- (a) Subtractive manufacturing
- (b) Additive manufacturing
- (c) Impact printing
- (d) Non-impact printing

21. Each bit of data is stored in the:

- (a) Memory transistors
- (b) Capacitors
- (c) Both a. and b.
- (d) None of these

22. What is a key advantage of LED monitors over LCD monitors?

- (a) High power consumption
- (b) Better image quality and power efficiency
- (c) Larger size and weight
- (d) Lower cost

23. Which of the following is an open source software?

- (a) Micro-soft office
- (b) Linux
- (c) Windows 11
- (d) Adobe Photoshop

24. The QWERTY layout is associated with:

- (a) Mouse
- (b) Scanner
- (c) Keyboard
- (d) Joystick

25. The main disadvantage of SSDs compared to HDDs is:

- (a) Slower performance
- (b) Higher cost per GB
- (c) More moving parts
- (d) Less storage capacity

26. Which port is commonly used for connecting external storage devices?

- (a) VGA
- (b) HDMI

- (c) USB
- (d) Ethernet

27. Which slot on the motherboard is used to install a graphics card?

- (a) PCIe (Peripheral Component Interconnect Express)
- (b) SATA (Serial Advanced Technology Attachment)
- (c) IDE (Integrated Drive Electronics)
- (d) DIMM (Dual Inline Memory Module)

28. USB is used to:

- (a) Data transfer
- (b) Power delivery
- (c) Both (a) and (b)
- (d) None of these

29. What is the main function of the RAM in a computer system?

- (a) To store permanent data
- (b) To process graphics
- (c) To store temporary data for quick access
- (d) To connect the computer to the internet

30. Which of the following is an example of non-volatile storage.

- (a) RAM
- (b) ROM
- (c) Cache memory
- (d) Registers

31. What is the main advantage of Ethernet over wi-fi?

- (a) Higher speed and reliability
- (b) Wireless connectivity
- (c) Portability
- (d) Lower cost

32. What types of software is used for managing files on your computer?

- (a) Application software
- (b) System software
- (c) Utility software
- (d) Mobile Apps

33. What is the storage capacity range of a pen drive?

- (a) 1 MB to 1 GB
- (b) 1 GB to 10 GB
- (c) 128 MB to a few terabytes
- (d) 10 GB to 100 GB

34. What is the primary function of the data bus?

- (a) To carry control signals
- (b) To connect the power supply
- (c) To carry physical address
- (d) To transmit data between the CPU, memory, and input/output devices

35. What is the final step in the CPU's function of processing instructions?

- (a) Fetching instructions
- (b) Decoding instructions
- (c) Executing instruction
- (d) Storing results

36. What is computer Based Training (CBT)?

- (a) Training conducted by robots
- (b) Training in computer repair
- (c) Training for computer games
- (d) Training using computer software and program

37. What type of memory temporarily stores frequently accessed data for quicker retrieval?

- (a) RAM
- (b) Cache memory
- (c) ROM
- (d) Hard Disk

38. What is the primary advantage of laser printers?

- (a) Low cost
- (b) High-quality text and graphics
- (c) Slow printing speed
- (d) Noisy operation

39. What does the IPOS cycle stand for?

- (a) Input, Process, Output, Storage
- (b) Input, Print, Output, Save

(c) Install, Process, Operate, Store

(d) Input, Program, Output, Save

40. What does the motherboard typically contain?

(a) Only the CPU

(b) Only the memory

(c) CPU, BIOS, Memory and various port

(d) Only the power supply

41. What are the cost effective features of secondary memory?

(a) High cost per bit

(b) Low cost per bit

(c) Limited storage capacity

(d) Volatile storage

42. Which is output device?

(a) keyboard

(b) mouse

(c) monitor

(d) scanner

43. Which parts of computer store temporary data?

(a) HDD

(b) ROM

(c) RAM

(d) SSD

44. Which device is used to convert softcopy to hard copy?

(a) printer

(b) OCR

(c) monitor

(d) joystick

45. What does ALU stands for in a computer system?

(a) Arithmetic Logic Unit

(b) Array Logic Unit

(c) Application Logic Unit

(d) Arithmetic Local Unit

46. Why do computers need secondary storage devices like a Hard Disk or SSD?

- (a) to increase CPU processing speed
- (b) to store data permanently
- (c) to display graphics on the screen
- (d) to connect to internet

47. If your computer is not recording your voice, which device should you check?

- (a) speaker
- (b) monitor
- (c) microphone
- (d) scanner

48. Which is the fastest memory of computer?

- (a) RAM
- (b) ROM
- (c) Cache
- (d) All of the above

49. Which of the following is the brain of the computer?

- (a) Control Unit
- (b) Arithmetic Logic Unit
- (c) Central Processing Unit
- (d) Memory Unit

50. A school wants to prepare ID cards with barcodes for use in the library. Which combination of devices will be most suitable?

- (a) Microphone and Speaker
- (b) Monitor and Keyboard
- (c) Printer and Barcode Reader
- (d) Webcam and Projector

51. Which of the following correctly differentiates RAM and ROM in terms of functionality?

- (a) RAM is non-volatile and used for permanent storage, while ROM is volatile and erased when power is off.
- (b) RAM temporarily holds data and programs during execution, while ROM permanently stores instructions needed for basic system functions.
- (c) Both RAM and ROM are volatile, but RAM is faster than ROM.
- (d) Both RAM and ROM are non-volatile, but ROM is faster than RAM.

52. Which of the following is NOT a characteristic of a computer?

- (a) Versatility
- (b) Diligence
- (c) Creativity
- (d) Accuracy

53. A bank needs software to manage daily processing of transactions. Which software is most suitable?

- (a) Tailored Software
- (b) Utility Software
- (c) Open Source Software
- (d) System Software

54. Which is the MOST suitable justification for calling RAM volatile memory?

- (a) It stores permanent data
- (b) It loses data when the power is off
- (c) It is slower than ROM
- (d) It is stored in the Hard Disk

55. ALU stands for:

- (a) Advanced Logical Unit
- (b) Arithmetic and Logic Unit
- (c) Analytical Logic Utility
- (d) Automatic Logical Unit

56. You need to back up a large video file. Which storage device would you choose?

- (a) RAM
- (b) SSD
- (c) Cache
- (d) Registers

57. System software is MOST essential because it:

- (a) Helps users design webpages
- (b) Connects hardware and application software
- (c) Prints and scans documents
- (d) Provides entertainment applications

58. Registers are located inside:

- (a) Motherboard

- (b) CPU
- (c) RAM
- (d) Hard Disk

59. A graphics designer requires software for creating animations. Which category of software is this?

- (a) System Software
- (b) Application Software
- (c) Utility Software
- (d) Firmware

60. Which is the MOST critical role of the Operating System?

- (a) Protecting the CPU
- (b) Translating user commands into hardware actions
- (c) Printing data
- (d) Enhancing the accuracy of the computer

61. Which of the following is an input device?

- (a) Plotter
- (b) Microphone
- (c) Projector
- (d) Printer

62. A school wants to record attendance using a fingerprint scanner. What type of device is this?

- (a) Input Device – Biometric
- (b) Output Device – Visual
- (c) Storage Device – Magnetic
- (d) Utility Software Device

63. Why is diligence considered a significant characteristic of a computer?

- (a) It works faster than humans
- (b) It works without getting tired
- (c) It has more memory than humans
- (d) It can generate creativity

64. Which memory is volatile?

- (a) ROM
- (b) Cache
- (c) RAM
- (d) Hard Disk

65. If RAM is full, the CPU uses to temporarily store data.

- (a) ROM
- (b) Registers
- (c) Virtual Memory
- (d) BIOS

66. If a company must choose between system software and application software for managing payroll, the BEST choice is:

- (a) System Software, because it manages hardware
- (b) Application Software, because it performs specific tasks
- (c) Utility Software, because it increases speed
- (d) Tailored Software, because it prevents hacking

67. The main function of the Control Unit is to:

- (a) Store data
- (b) Process data
- (c) Direct data flow and instructions
- (d) Print data

68. An office requires quick printing of large volumes of text documents. Which printer type is most suitable?

- (a) Inkjet
- (b) Laser
- (c) 3D
- (d) Dot Matrix

69. Open-source software is more beneficial for developing countries mainly because:

- (a) It requires no electricity
- (b) It can be freely customized and distributed
- (c) It is always faster than proprietary software
- (d) It comes pre-installed on all computers

70. Which of the following is secondary storage?

- (a) RAM
- (b) Registers
- (c) SSD
- (d) Cache

71. A hospital uses software to manage patient records. This is an example of:

- (a) Utility Software
- (b) Tailored Software
- (c) System Software
- (d) Device Driver

72. Which evaluation is MOST accurate about ROM and RAM?

- (a) ROM is faster than RAM
- (b) RAM stores data permanently, ROM temporarily
- (c) RAM is volatile; ROM is non-volatile
- (d) Both are volatile memories

73. Which one is NOT system software?

- (a) Operating System
- (b) Compiler
- (c) Antivirus
- (d) MS Word

74. A library wants to scan QR codes for issuing books. Which devices are needed?

- (a) Scanner and Monitor
- (b) Barcode Reader and Database Software
- (c) Printer and Speaker
- (d) Projector and Webcam

75. Which analysis BEST explains the role of registers in CPU performance?

- (a) Registers store permanent instructions
- (b) Registers provide the fastest storage for immediate processing
- (c) Registers replace cache memory
- (d) Registers act as secondary memory

76. The full form of HDMI is:

- (a) High Definition Media Interface
- (b) High Digital Memory Interface
- (c) High Definition Multimedia Interface
- (d) High Data Media Interchange

77. If a school installs Linux (open-source OS) instead of Windows, the biggest benefit is:

- (a) Better gaming support
- (b) Free use and customization

(c) Higher RAM speed

(d) Stronger hardware

78. If you were asked to design a small library system, which components would you select?

(a) CPU, RAM, Barcode Reader, Database Software

(b) CPU, ROM, Projector, Microphone

(c) Motherboard, Printer, Speakers

(d) Control Unit, ALU, Registers only

79. A bank needs to ensure fast access to customer transaction data while processing. Which memory should the system rely on?

(a) Hard Disk Drive

(b) RAM

(c) CD-ROM

(d) Pen Drive

80. A student is preparing a report on their computer and wants to store it for future use. Which storage device will be most appropriate?

(a) ROM

(b) RAM

(c) Cache Memory

(d) Hard Disk / SSD

81. A company wants to run video conferencing smoothly without lag. Which component plays the most important role in executing the processing quickly?

(a) Microphone

(b) Headphone

(c) CPU

(d) Scanner

82. While booting, the system loads essential instructions before the operating system starts. Where are these instructions stored?

(a) RAM

(b) Hard Disk

(c) BIOS (ROM chip)

(d) USB Drive

- 83. A graphics designer uses a computer to edit high-resolution images. Which computer feature is most useful for this task?**
- (a) Diligence
 - (b) Versatility
 - (c) High Speed Processing
 - (d) GIGO
- 84. If a user deletes a file by mistake but wants to recover it immediately, which system software feature is helpful?**
- (a) Disk Cleanup
 - (b) File Management (Recycle Bin)
 - (c) BIOS Settings
 - (d) Word Processor
- 85. An ATM machine requires both input and output devices. Which combination correctly represents them?**
- (a) Keyboard and Printer
 - (b) Joystick and Plotter
 - (c) Mouse and Speakers
 - (d) Card Reader and Screen
- 86. A school uses projectors in classrooms to display presentations. Which category of computer hardware does the projector belong to?**
- (a) Input Device
 - (b) Output Device
 - (c) Storage Device
 - (d) Processing Device
- 87. If the CPU is compared to the "brain of the computer," which component would be most similar to the "memory" of the human brain?**
- (a) RAM
 - (b) Keyboard
 - (c) Monitor
 - (d) Scanner
- 88. Imagine a hospital where patient data must be stored permanently and accessed quickly by doctors. Which combination of hardware/software is most essential?**
- (a) RAM + Application Software

- (b) Monitor + Printer
- (c) CPU + Utility Software
- (d) Hard Disk/SSD + Database Management Software

89. A user mistakenly inputs the wrong data while preparing an invoice, which results in an incorrect bill being generated. Which principle of the computer system explains this situation?

- (a) Diligence
- (b) Speed
- (c) GIGO
- (d) Versatility

90. A self-driving car continuously collects data from cameras and sensors, then processes it to make driving decisions. Which part of the computer system is most responsible for this real-time decision-making?

- (a) Input Devices
- (b) Output Devices
- (c) CPU
- (d) Secondary Storage

91. What is the role of a monitor as an output device in a computer system?

- (a) Monitors capture and decode barcodes.
- (b) Monitors provide a visual display of digital information such as text, images, and videos.
- (c) Monitors regulate the power supply to other output devices.
- (d) Monitors convert hand-drawn sketches into digital format.

92. What is the role of microphones as an input device in a computer system?

- (a) Microphones capture and decode barcodes.
- (b) Microphones record audio input, allowing for voice commands or communication.
- (c) Microphones read information from magnetic stripes.
- (d) Microphones are used for scanning documents.

93. What is the primary function of a printer as an output device?

- (a) Convert printed or handwritten text into digital form
- (b) Display graphics on the screen
- (c) Produce a hard copy of digital documents or images
- (d) Record audio input

94. What is the primary function of a microprocessor in a personal computer? [Source text supplied only two options.]

- (a) Display graphics on the screen
- (b) Manage power supply to peripherals

95. Which of the following is not software?

- (a) Keyboard
- (b) Web Browser
- (c) Video Player
- (d) Word Processor

Chapter 2: Number System

1. What is the result of the binary addition: $1101 + 1011$?

- (a) $(11010)_2$
- (b) $(11000)_2$
- (c) $(11110)_2$
- (d) $(11101)_2$

2. When adding two binary numbers, what is the carrying value in binary addition?

- (a) 100
- (b) 1
- (c) 10
- (d) 11

3. In binary multiplication, what is the result when multiplying any binary digit by 0?

- (a) 1
- (b) 11
- (c) 0
- (d) The original digit

4. What is the base of the octal number system?

- (a) 2
- (b) 7
- (c) 8
- (d) 10

5. How many Megabytes are there in 1 Gigabyte?

- (a) 1024 Megabyte
- (b) 1042 Megabyte
- (c) 2000 Megabyte
- (d) 2048 Megabyte

6. What is binary equivalent to the octal number 64?

- (a) $(110100)_2$
- (b) $(110111)_2$
- (c) $(1110001)_2$
- (d) $(11000101)_2$

7. In the hexadecimal system, what does the symbol 'A' represent?

- (a) 11

(b) 12

(c) 10

(d) 13

Chapter 3: Block Programming

1. To make your program generate results, you can use event block called

- (a) when [flag] clicked
- (b) when the sprite clicked
- (c) both (a) and (b)
- (d) none of the above

2. The background image in the stage area is called

- (a) background
- (b) wallpaper
- (c) backdrop
- (d) design

3. Which type of block in Scratch is used to repeat actions?

- (a) Motion Block
- (b) Control Block
- (c) Looks Block
- (d) Sensing Block

4. What is the primary use of "sensing blocks" in Scratch?

- (a) To control sprite movements
- (b) To detect events like key presses or mouse clicks
- (c) To display messages on the stage
- (d) To add sound effects to a project

5. Which is the character that performs an action on the stage of the Scratch window?

- (a) Sprite
- (b) Stage
- (c) Backdrop
- (d) Block

6. Which of the following is NOT a block programming platform?

- (a) Scratch
- (b) Blockly
- (c) Snap!
- (d) Python

7. Block programming is similar to:

- (a) Writing essays

- (b) Solving puzzles
- (c) Drawing maps
- (d) Solving equations

8. In Scratch, the character that performs actions is called:

- (a) Stage
- (b) Sprite
- (c) Backdrop
- (d) Block

9. Which Scratch block is used to make characters move?

- (a) Motion block
- (b) Event block
- (c) Sensing block
- (d) My block

10. The default character (sprite) in Scratch is:

- (a) Dog
- (b) Cat
- (c) Bird
- (d) Fish

11. Which component in micro-bit displays images, text, or animations?

- (a) Buttons
- (b) 5×5 LED matrix
- (c) Microphone
- (d) Sensors

12. In Scratch, which block would you use to repeatedly move a sprite 10 steps until it touches the edge?

- (a) forever [move 10 steps]
- (b) if touching edge → move 10 steps
- (c) repeat until [touching edge] → move 10 steps
- (d) wait until [touching edge] → move 10 steps

13. Which of the following best describes the use of "My Blocks" in Scratch?

- (a) Used to store data
- (b) Used to add new sprites
- (c) Used to create custom blocks for repeated use

(d) Used to control events

14. Which block controls repetition in block programming?

(a) Looks

(b) Loop

(c) Event

(d) Sound

15. Which of the following is a popular block-based visual programming language?

(a) HTML

(b) Python

(c) Scratch

(d) CSS

16. What can users create with scratch?

(a) Operating systems

(b) Hardware components

(c) Network protocols

(d) Animations, games and interactive stories

17. Which of the following is an example of a block-based programming language?

(a) Python

(b) Scratch

(c) C++

(d) Java

18. Which feature of block programming helps beginners most?

(a) Use of complex syntax

(b) Use of graphical blocks

(c) Use of the command line

(d) Text-only code

19. Scratch was developed by:

(a) Microsoft

(b) MIT Media Lab

(c) Google

(d) Apple

20. In Scratch, which block category is used for loops and conditions?

(a) Events

- (b) Control
- (c) Motion
- (d) Looks

21. Which block in Scratch is used to change the appearance of a sprite?

- (a) Motion
- (b) Events
- (c) Looks
- (d) Operators

22. The device Micro:bit is mainly used for:

- (a) Gaming only
- (b) Teaching coding and electronics
- (c) Video editing
- (d) Web design

23. Which sensor in Micro:bit is used to detect movement?

- (a) Temperature sensor
- (b) Accelerometer
- (c) Microphone
- (d) GPS

24. What does "IDE" stand for in programming?

- (a) Integrated Design Environment
- (b) Integrated Development Environment
- (c) Internal Data Editor
- (d) Input Device Emulator

25. Arduino UNO is an example of a:

- (a) Software Application
- (b) Microcontroller Board
- (c) Programming Language
- (d) Database System

26. Which block in Scratch is used to start actions when the green flag is clicked?

- (a) Motion block
- (b) Events block
- (c) Control block
- (d) Looks block

27. The block category in Scratch used to play sounds is ...

- (a) Motion
- (b) Sound
- (c) Control
- (d) Operator

28. Which type of block has a puzzle-piece shape that fits together?

- (a) Stack Block
- (b) Hat Block
- (c) Reporter Block
- (d) C-block

29. The area where we drag and drop blocks to build programs is called

- (a) Block Palette
- (b) Coding Area (Scripts Area)
- (c) Stage
- (d) Toolbar

30. In Scratch, the block "repeat until" belongs to which category?

- (a) Motion
- (b) Control
- (c) Sensing
- (d) Events

31. The block that starts with a curved top and cannot be attached above is called

- (a) Hat Block
- (b) Stack Block
- (c) Reporter Block
- (d) C-block

32. Which extension in Scratch is used to control external hardware like Micro:bit?

- (a) Pen Extension
- (b) Music Extension
- (c) Hardware Extension
- (d) Micro:bit Extension

33. A collection of coding blocks arranged together to perform a task is called

- (a) Script
- (b) Costume

- (c) Stage
- (d) Event

34. In Micro:bit, the LED display consists of LEDs.

- (a) 4x4
- (b) 5x5
- (c) 6x6
- (d) 8x8

35. The small device that connects sensors and actuators with programming is

- (a) Monitor
- (b) Microcontroller
- (c) Processor
- (d) Keyboard

36. There are _____ extensions in Scratch programming.

- (a) 5
- (b) 9
- (c) 11
- (d) 12

37. "ask What's your name? and wait" is an example of _____ block

- (a) sensing
- (b) control
- (c) operator
- (d) looks

38. Which block in Scratch for micro programming is used to display text or patterns on the LED matrix?

- (a) Show LEDs Block
- (b) Display Block
- (c) Animation Block
- (d) Matrix Block

39. What are devices like Micro:bit and Arduino used for?

- (a) Physical computing
- (b) Combining programming with physical devices
- (c) Creating interactive projects
- (d) All of the above

Chapter 4: Web Technology

1. What does HTML stand for?

- (a) Hyperlinks and Text Markup Language
- (b) Hypertext Markup Language
- (c) Home Tool Markup Language
- (d) Hyperpage Markup Language

2. Which of the following is a commonly used text editor for web development?

- (a) Microsoft Word
- (b) Notepad
- (c) Sublime Text
- (d) Photoshop

3. Choose the correct HTML tag for the largest heading.

- (a) <h3>
- (b) <h1>
- (c) <big heading>
- (d) <h6>

4. What is the correct HTML tag for inserting a horizontal line?

- (a)

- (b) <hr>
- (c) <ar>
- (d) <tr>

5. What is the correct HTML for adding a background color?

- (a) <body bgcolor="yellow">
- (b) <background> yellow </background>
- (c) <body color="yellow">
- (d) <body background = "yellow">

6. Choose the correct HTML tag to give base value.

- (a) <Power>
- (b) <sup>
- (c) <base>
- (d) <sub>

7. Which of the following is an empty tag?

- (a)

- (b) <title>
- (c) <sup>
- (d)

8. Which of the following is correct syntax for inserting external CSS?

- (a) <link real="stylesheet" type="text/CSS" href="file.css">
- (b) <link reel="stylesheet" type="css/text" href="file.css">
- (c) <link rel="stylesheet" type="text/css" href="css.file">
- (d) <link rel="stylesheet" type="text/css" href="file.css">

9. Which of the following are character formatting tags?

- (a) <sup> tag
- (b) tag
- (c) <i> tag
- (d) All of them

10. Why is CSS used with HTML?

- (a) CSS reduces HTML code
- (b) CSS reduces file size
- (c) CSS can be defined and used in multiple places
- (d) All of them

11. Which of the following is not a type of CSS?

- (a) Embedded CSS
- (b) Inline CSS
- (c) Internal CSS
- (d) External CSS

12. Why are comments useful in HTML?

- (a) Write program codes.
- (b) Add notes for developers without affecting output.
- (c) Make text bold
- (d) Design web pages

13. Which CSS property is used to change background color?

- (a) bgcolor
- (b) background
- (c) background-color
- (d) color

14. Which tag is used to create a hyperlink in HTML?

- (a) tag
- (b) <a> tag
- (c) <link> tag
- (d) <href> tag

15. Which attribute is used to apply inline CSS in HTML?

- (a) style
- (b) css
- (c) font
- (d) design

16. Which HTML tag is used to display the smallest heading?

- (a) <h0> tag
- (b) <h1> tag
- (c) <h2> tag
- (d) <h6> tag

17. Which HTML tag is used to link an external CSS file?

- (a) <css>
- (b) <style>
- (c) <link>
- (d) <script>

18. Which tag is used to insert an image in a webpage?

- (a) <Photo>
- (b)
- (c) <picture>
- (d) <image>

19. CSS stands for:

- (a) Cascading Style Sheets
- (b) Computer Style Sheets
- (c) Creative Style System
- (d) Colorful Style Sheets

20. Which of the following tag is used to draw horizontal lines?

- (a)

- (b) <hr>

- (c) <h1>
- (d) <line>

21. Which tag is used to create a text input field?

- (a) <textarea>
- (b) <input type="text">
- (c) <input type="password">
- (d) <form>

22. Which tag is used to insert a table row in HTML?

- (a) <tr> tag
- (b) <td> tag
- (c) <table> tag
- (d) <th> tag

23. Which input type creates small round buttons?

- (a) checkbox
- (b) radio
- (c) select
- (d) option

24. Which HTML tag is used to make text bold.

- (a) <i>
- (b) <u>
- (c)
- (d) <bold>

25. Which tag is used to write a small piece of text?

- (a) <textarea>
- (b) <input type="text">
- (c) <input type="password">
- (d) <input type="textarea">

26. <A> tag is used for....

- (a) Image
- (b) Audio
- (c) Link
- (d) Video

27. What is the proper extension of html file?

- (a) .html
- (b) .http
- (c) .https
- (d) .css

28. Why do web developers use CSS alongside HTML?

- (a) to structure the content
- (b) to style and design the page
- (c) to host the website
- (d) to create a database

29. Which HTML code is the correct way to display an image named "photo.jpg" on a webpage?

- (a) <image src="photo.jpg">
- (b)
- (c)
- (d) <pic src="photo.jpg">

30. Which of the following is an example of a container tag?

- (a)
- (b)

- (c) <p>
- (d) <hr>

31. Which CSS unit is relative to the root element's font size?

- (a) px
- (b) em
- (c) rem
- (d) %

32. You want to make text bold in HTML. Which tag should you use?

- (a) <i>
- (b)
- (c) <u>
- (d)

33. Which of the following best describes HTML?

- (a) A programming language
- (b) A markup language

- (c) A database language
- (d) A compiler

34. You need to create a numbered list. Which tag will you use?

- (a)
- (b)
- (c)
- (d) <dl>

35. What is the correct full form of CSS?

- (a) Cascading Style Syntax
- (b) Computer Style Sheets
- (c) Cascading Style Sheets
- (d) Code Style Sheets

36. Which CSS property is used to increase space inside an element's border?

- (a) Margin
- (b) Padding
- (c) Spacing
- (d) Border

37. Which tag is used to insert a line break in HTML?

- (a) <lb>
- (b) <break>
- (c)

- (d) <line>

38. To open a link in a new browser tab, which attribute value is used in <a> tag?

- (a) target="_blank"
- (b) target="_self"
- (c) target="_tab"
- (d) target="_new"

39. Which attribute is used to define a link's destination in HTML?

- (a) src
- (b) href
- (c) link
- (d) alt

40. Which HTML tag creates a table row?

- (a) <td>
- (b) <tr>
- (c) <th>
- (d) <row>

41. Which type of CSS applies only to one document and is placed inside <style> tags?

- (a) Inline CSS
- (b) External CSS
- (c) Internal CSS
- (d) Embedded CSS

42. You want to underline text in HTML. Which tag should you use?

- (a) <i>
- (b) <u>
- (c) <underline>
- (d)

43. Which tag is used to create a list with bullets?

- (a)
- (b)
- (c) <dl>
- (d)

44. Which CSS property sets the text alignment?

- (a) font-align
- (b) text-align
- (c) content-align
- (d) align

45. Which CSS property changes the background color?

- (a) text-color
- (b) bgcolor
- (c) background-color
- (d) color

46. Which HTML tag is used to create a form for user input?

- (a) <input>
- (b) <form>

- (c) <fieldset>
- (d) <textarea>

47. Which HTML tag is used to display an image?

- (a) <src>
- (b)
- (c) <image>
- (d) <pic>

48. Which CSS property is used to set the size of text?

- (a) text-size
- (b) font-style
- (c) font-size
- (d) size

49. Which of the following is a block-level element?

- (a)
- (b) <div>
- (c) <a>
- (d)

50. To insert an image from a folder named "images", which syntax is correct?

- (a)
- (b) <image href="images/pic.jpg">
- (c) <src link="images/pic.jpg">
- (d)

51. In HTML, which attribute is used to define alternate text for an image?

- (a) title
- (b) alt
- (c) name
- (d) src

52. Which of the following is NOT a semantic HTML tag?

- (a) <article>
- (b)
- (c) <header>
- (d) <section>

53. Which HTTP status code indicates "Page Not Found"?

- (a) 200
- (b) 301
- (c) 404
- (d) 500

54. If you want to combine rows in an HTML table, which attribute will you use?

- (a) colspan
- (b) rowspan
- (c) align
- (d) merge

55. To create a form where users can enter their email, which input type should be used?

- (a) `<input type="text">`
- (b) `<input type="email">`
- (c) `<input type="mail">`
- (d) `<input type="address">`

56. What is the correct HTML for making a hyperlink?

- (a) `<a url="http://www.ntb.gov.np"> Nepal Tourism Board </a>`
- (b) `<a href="http://www.ntb.gov.np"> Nepal Tourism Board </a>`
- (c) `<a name="http://www.ntb.gov.np"> Nepal Tourism Board </a>`
- (d) `<a> http://www.ntb.gov.np </a>`

57. How can you make an email link?

- (a) `<mail> xxx@yyy </mail>`
- (b) `<a href="mailto:xxx@yyy">`
- (c) `<mail href = "xxx@yyy">`
- (d) `<a href="xxx@yyy">`

58. How can you open a link in the same browser window?

- (a) `<a href = "url" target = "_blank">`
- (b) `<a href - "url" target - "new">`
- (c) `<a href - "url" same>`
- (d) `<a href ="url" target= "_self">`

59. Which symbol is used to denote an ID selector in CSS?

- (a) &
- (b) #

(c) !

(d) @

60. What is the primary purpose of a wireframe in web development?

(a) To test functionality

(b) To showcase final design

(c) To outline basic structure and layout

(d) To implement coding

61. In web design, what does "UI" primarily focus on?

(a) User Interaction

(b) User Exploration

(c) User Expression

(d) User Experience

62. There are _____ types of CSS.

(a) one

(b) three

(c) two

(d) four

63. Which of the following CSS tags is used for creating External Style Sheets? [Source text supplied only one option.]

(a) <style src="mystyle.css">

Chapter 5: Internet and Social Media

1. Which of the following is a correct term that describes the multimedia content and interlinked collection of hypertext documents on the Internet?

- (a) Internet
- (b) World Wide Web (WWW)
- (c) Web Browser
- (d) Search Engine

2. The main purpose of the internet is to

- (a) send emails
- (b) play games
- (c) access and display hypertext documents on the web
- (d) edit images

3. Which of the following is a secure version of HTTP, providing encrypted communication?

- (a) HTTP
- (b) HTTPS
- (c) FTP
- (d) SMTP

4. is the primary purpose of a Virtual Private Network (VPN).

- (a) Securely connect to the internet and access resources
- (b) used for online meetings
- (c) Play online games
- (d) Edits images online

5. The main purpose of social media is

- (a) editing documents
- (b) connecting, sharing, and talking to others online
- (c) playing online games
- (d) sending emails

6. Which of the following is not an example of a VPN?

- (a) NordVPN
- (b) Google Meet VPN
- (c) ExpressVPN
- (d) Super unlimited proxy

7. What does URL stand for?

- (a) Unique Resource Location
- (b) Uniform Resource Locator
- (c) Universal Reference Link
- (d) Unified Retrieval Link

8. What advice would you give to a friend who wants to start a blog but doesn't have any ideas?

- (a) Stop thinking about blog.
- (b) Copy content from similar blog.
- (c) Write only about your locality.
- (d) Choose topic and write in own language.

9. Where was WWW developed?

- (a) NASA
- (b) CERN
- (c) Microsoft
- (d) Apple

10. Primary objective of web cam is for:

- (a) Live streaming
- (b) Video conferencing
- (c) Video telephony
- (d) All of the above

11. Which was the first web browser?

- (a) Chrome
- (b) Mosaic
- (c) Firefox
- (d) Safari

12. Which one is secure?

- (a) HTTP
- (b) HTTPS
- (c) FTP
- (d) SMTP

13. Which one is used to remove login?

- (a) Team Viewer
- (b) Facebook

(c) Google meet

(d) Social media

14. are individual entities called in a blog.

(a) Pages

(b) Section

(c) Posts

(d) Articles

15. Which social media platform is famous for professional networking?

(a) Facebook

(b) LinkedIn

(c) Twitter(X)

(d) Instagram

16. ".edu" in a domain represents which type of site?

(a) Educational

(b) Organizational

(c) Governmental

(d) Commercial

17. Which of the following is an example of a secure search engine?

(a) Google

(b) Bing

(c) DuckDuckGo

(d) All of the above

18. In a blog, what is the use of "Archives"?

(a) To edit photos

(b) To view old posts

(c) To chat with users

(d) To make video calls

19. Which is an example of social media?

(a) zoom

(b) instagram

(c) winRAR

(d) RAM

20. Which of the following is an example of a web browser?

- (a) Google
- (b) Windows 11
- (c) HTML
- (d) Mozilla Firefox

21. What is remote login?

- (a) browsing the internet
- (b) accessing a remote computer
- (c) sending an E-mail
- (d) accessing a local computer

22. Which of the following is the correct full form of URL?

- (a) Uniform Resource Locator
- (b) Universal Reference Link
- (c) Uniform Reference Locator
- (d) Universal Resource Link

23. Which one is NOT a web browser?

- (a) Chrome
- (b) Mozilla Firefox
- (c) Bing
- (d) Safari

24. Which protocol is used for secure communication over the web?

- (a) HTTP
- (b) HTTPS
- (c) FTP
- (d) SMTP

25. Which of the following is NOT a search engine?

- (a) Google
- (b) Yahoo
- (c) YouTube
- (d) DuckDuckGo

26. Which of the following is an example of video conferencing software?

- (a) Zoom
- (b) Gmail

- (c) Outlook
- (d) Photoshop

27. Which protocol is mainly used for sending emails?

- (a) HTTP
- (b) SMTP
- (c) FTP
- (d) DNS

28. Which TeamViewer feature is provided by AnyDesk and TeamViewer?

- (a) Image editing
- (b) Remote login
- (c) File compression
- (d) Virus scanning

29. The "S" in HTTPS stands for:

- (a) Safe
- (b) Secure
- (c) System
- (d) Standard

30. Which of the following is an example of a blog platform?

- (a) Facebook
- (b) Instagram
- (c) WordPress
- (d) YouTube

31. Which of the following is NOT an advantage of email?

- (a) Fast delivery
- (b) Cost effective
- (c) Accessible anytime
- (d) Requires face-to-face presence

32. Which of the following applications are used for online meetings?

- (a) Google Meet
- (b) Zoom
- (c) Skype
- (d) All of the above

33. Why is blogging used?

- (a) Share blog posts on social media
- (b) Allow readers to interact and discuss
- (c) Categorize posts based on topics
- (d) All of the above

34. Which of the following is an example of a search engine?

- (a) Chrome
- (b) Google
- (c) WhatsApp
- (d) Firefox

Chapter 6: Cyber Security and Digital Citizenship

1. The full form of ETA is

- (a) Electronic Transaction Act
- (b) Electric Transmission Action
- (c) Electronic Transform Act
- (d) Electronic Transaction Awareness

2. Who registers complaints of cybercrime in Nepal?

- (a) Nepal Telecommunication Authority
- (b) Local police stations
- (c) Cyber Bureau of Nepal
- (d) The Ministry of Home Affairs

3. is not an example of antivirus software.

- (a) Kaspersky
- (b) Firewall
- (c) Avast
- (d) Norton 360

4. Which of the following is not a cybercrime?

- (a) Accessing child pornography contents
- (b) Authentication
- (c) Phishing
- (d) Brute force attack

5. Which of the following is not cyber security?

- (a) Network security
- (b) Information Security
- (c) Application software
- (d) Quantum Security

6. Which Act deals with cybercrime issues?

- (a) IT Act 2000
- (b) ETA 2063
- (c) Cyber Law 2010
- (d) Privacy Act 2020

7. Which of the following is a weak password?

- (a) Admin123

- (b) Qwerty
- (c) 123456
- (d) All of the above

8. Who is a digital citizen?

- (a) Someone who knows how to use the internet responsibly
- (b) Someone who plays games online
- (c) Someone who buys online only
- (d) Someone who owns a smartphone

9. Which of the following is an active digital footprint?

- (a) Phone calls
- (b) Social media post
- (c) Emails
- (d) All of the above

10. Multi-factor authentication requires:

- (a) Only a username
- (b) Only a password
- (c) Two or more verification
- (d) None of the above

11. You receive a message saying "Congratulation You won iPhone 17 Pro Max, Click the link below for further process". What should you do?

- (a) click the link
- (b) forward the message to friend
- (c) delete the message and report it as spam
- (d) Provide limited information

12. You receive an unexpected SMS message claiming you have won a lottery, along with a link to "claim your price." What is the safest action to take?

- (a) Click the link to see if it is real.
- (b) Ignore and delete the message.
- (c) Forward the link to your friends.
- (d) Reply to the message with your bank details.

13. Which cybersecurity method ensures that even if one factor is compromised, another layer of security protects the system?

- (a) Passwords

- (b) Multi-Factor Authentication (MFA)
- (c) Antivirus
- (d) Backup

14. Which of the following is an example of identity theft?

- (a) Installing antivirus software
- (b) Using a VPN
- (c) Stealing someone's personal information to open a bank account
- (d) Creating a blog

15. Ransomware is mainly designed to:

- (a) Secure files
- (b) Encrypt data and demand payment
- (c) Speed up system performance
- (d) Remove malware

16. Which of the following best reduces the risk of phishing attacks?

- (a) Stronger hardware
- (b) Data backup
- (c) Email security solutions
- (d) Digital footprint

17. Which cybersecurity practice prevents unauthorized tracking of user activity online?

- (a) Password manager
- (b) VPN
- (c) Backup
- (d) Antivirus

18. Which of the following is NOT a type of cybercrime?

- (a) Cyber harassment
- (b) Identity theft
- (c) Social media posting
- (d) Malware attacks

19. Which option best explains "digital footprint"?

- (a) Physical marks left on a computer
- (b) Record of user's online activities
- (c) Backup files stored online
- (d) A type of antivirus

20. Security awareness training mainly helps:

- (a) Increase internet speed
- (b) Educate users to avoid cyber threats
- (c) Remove malware automatically
- (d) Encrypt files

21. Which of the following is a safe web browsing technique?

- (a) Clicking unknown links
- (b) Avoiding software updates
- (c) Using HTTPS websites only
- (d) Sharing personal data freely

22. Password managers are useful because they:

- (a) Store weak passwords in text format
- (b) Auto-generate strong and unique passwords
- (c) Eliminate the need for any password
- (d) Allow anyone to access accounts easily

23. Cyber law is commonly known as

- (a) law of the Internet
- (b) Digital Legislation
- (c) prevention method of cyber crime
- (d) ways of using the internet

24. The Electronic Transactions Act of Nepal also consists of

- (a) constitution
- (b) cyber laws
- (c) computer software
- (d) transaction records

25. The combination of username and ... is basically known as a user credential.

- (a) password
- (b) security question
- (c) biometric
- (d) phone number

26. When was the Electronic Transaction Act published?

- (a) 2063 B.S
- (b) 2053 B.S

(c) 2062 B.S

(d) 2058 B.S

27. Two-factor authentication (2FA) increases account security by requiring

(a) only a password

(b) two different verification methods

(c) a username and captcha

(d) backup files

Chapter 7: Concept of Programming (Python)

1. In the context of programming language, what does the term "syntax" refer to?

- (a) The meaning of the code
- (b) A set of instructions
- (c) Efficiency of code execution
- (d) Structure and rules of code

2. A computer understands

- (a) high level programming language
- (b) low level programming language
- (c) natural human language
- (d) symbols and pictures

3. How does a flowchart represent a process in a program?

- (a) It provides a set of instructions for the computer.
- (b) It visually shows the steps and decision points in a process.
- (c) It directly executes the algorithm on the computer.
- (d) It is a high-level programming language.

4. How does an algorithm differ from flowchart?

- (a) Algorithm is visual, while a flowchart is textual representation.
- (b) An algorithm and flowchart are interchangeable terms.
- (c) Algorithm is programming language, while flowchart is abstract concept.
- (d) Algorithm is a step-by-step procedure, while flowchart is a programming language.

5. Python is a programming language.

- (a) natural
- (b) low-level
- (c) high-level
- (d) easy

6. What are keywords in Python?

- (a) Words used as comment in code
- (b) Identifiers for variables
- (c) Special words reserved for specific purpose
- (d) User-defined functions

7. Input function is used in Python to

- (a) retrieve user input

- (b) display the information
- (c) define variable
- (d) perform mathematical calculation

8. What data type in Python is suitable for representing text and characters?

- (a) Float
- (b) Boolean
- (c) Int
- (d) String

9. What will be the result of the following expression: float("3.14")?

- (a) 3.14
- (b) 3
- (c) "3.14"
- (d) Error

10. What is the function of the NOT operator in Python?

- (a) Check for equality
- (b) Give True value
- (c) Convert expression to string
- (d) Negate Boolean expression

11. What does the given image represent? (Flowchart: "Is it raining?" → Yes: Bring umbrella; No: No need to bring umbrella)

- (a) It is a flowchart telling us to bring umbrella.
- (b) It is a flowchart giving us information about rain.
- (c) It is a flowchart showing decision to make based on the condition of rain.
- (d) It is a flowchart telling us not to bring umbrella.

12. How are elements accessed in a Python list?

- (a) By keys
- (b) By values
- (c) By indices
- (d) By attributes

13. Which of the following statements accurately describes the mutability of Python lists and dictionaries?

- (a) Lists are immutable, while dictionaries are mutable.
- (b) Both lists and dictionaries are immutable.

- (c) Both lists and dictionaries are mutable.
- (d) Lists are mutable, while dictionaries are immutable.

14. Which of the following is an arithmetic operator?

- (a) >
- (b) **
- (c) <
- (d) \

15. Why is 3Number an invalid identifier?

- (a) It has capital N.
- (b) It starts with a number.
- (c) It is a keyword.
- (d) It has only 7 characters.

16. Which of the following is the correct extension of a python file?

- (a) PYth
- (b) .Ph
- (c) .Py
- (d) .PF

17. In Python, a list is a data type used to store data within:

- (a) Curly brackets
- (b) Square brackets
- (c) Parentheses
- (d) None of the above

18. What will be the value of the expression A,B = 5,8?

- (a) A = 5, B = 5
- (b) A = 8, B = 8
- (c) A = 5, B = 8
- (d) None of them

19. Which of the following is not a valid variable name in Python?

- (a) my-var
- (b) _var2
- (c) 2_var
- (d) var_2

20. How do you insert a comment that spans multiple lines in Python?

- (a) # This is a multi-line comment #
- (b) ''' This is a multi-line comment '''
- (c) // This is a multi-line comment //
- (d) /* This is a multi-line comment */

21. Which of the following is true about Python dictionaries?

- (a) Keys must be unique.
- (b) Values must be unique.
- (c) Dictionaries are ordered in Python 3.5.
- (d) Dictionaries cannot be nested.

22. In the following expression $52-5 = ?$**

- (a) 30
- (b) 25
- (c) 20
- (d) None of them

23. Which of the following is a looping statement.

- (a) 'If' statement
- (b) 'for' statement
- (c) 'if-else' statement
- (d) None of them

24. Find the value of variable n in the following expression: $n = \text{int}(9.8)$

- (a) $n = 10$
- (b) $n = 9$
- (c) $n = 9.8$
- (d) None of them

25. What will be the output of `print(10 // 3)`?

- (a) 3.33
- (b) 3
- (c) 3.0
- (d) 4

26. Find the correct output of the following expression: `>>>len("Dang")`

- (a) 2
- (b) 3

(c) 4

(d) 5

27. Which operator is used for exponentiation in Python?

(a) ^

(b) **

(c) %

(d) *

28. What is the output produced by the following expression: >>>print(round(3.7))

(a) 3

(b) 4

(c) 3.7

(d) 2

29. Which function is used to take input from the user in Python?

(a) input ()

(b) scanf ()

(c) read ()

(d) cin ()

30. Which of these is a Python data type?

(a) integer

(b) float

(c) string

(d) All of the above

31. Which of the following creates an infinite loop? [(a) a = 1; While (a<=3): print(a)] [(b) b = 1;

While (b<=3): print(b*b)] [(c) c = 5; While (c>=1): print(c)]

(a) (a)

(b) (b)

(c) (c)

(d) Both (a) and (b)

32. Which keyword is used to define a function in Python?

(a) def

(b) function

(c) fun

(d) define

33. What will be the output of the following code? >>> n = "KATHMANDU" >>> Print(n.lower())

- (a) kathmandu
- (b) KATHMANDU
- (c) Kathmandu
- (d) None of them

34. Which Python operator gives reminder?

- (a) **
- (b) /
- (c) //
- (d) %

35. Proper output of the given codes. #code print(5//2)

- (a) 3
- (b) 2
- (c) 2.5
- (d) 1

36. What will be output of the expression print (3 ** 2) in Python?

- (a) 5
- (b) 6
- (c) 8
- (d) 9

37. What is the purpose of type casting in python?

- (a) to convert one data type to another
- (b) to declare a variable
- (c) to create a function
- (d) to write comments

38. Which of the following is an arithmetic operator in python?

- (a) ==
- (b) AND
- (c) +
- (d) =

39. Which of the following is a logical operator in Python?

- (a) +
- (b) *

- (c) /
- (d) and

40. A variable in Python is:

- (a) A fixed value in memory
- (b) A container for storing data values
- (c) A type of operator
- (d) A built-in function

41. What will be the output of: `print(type("123"))`

- (a) int
- (b) float
- (c) str
- (d) bool

42. Which of the following is a popular feature of Python?

- (a) Slow execution speed
- (b) Easy readability
- (c) Complex syntax
- (d) No library support

43. Which statement will correctly calculate the average of two numbers a and b? (Note: options are hard to read in the scan; please verify)

- (a) `avg = (a + b) / 2`
- (b) `avg = a + b / 2`
- (c) `avg = a / b + 2`
- (d) `avg = a + b / 2`

44. In Python, which symbol is used for comments?

- (a) //
- (b) #
- (c) /* */
- (d) <!-- -->

45. What will the following code display? `for i in range(1, 6): print(i, end=" ")`

- (a) 1 2 3 4
- (b) 0 1 2 3 4 5
- (c) 1 2 3 4 5
- (d) 1 2 3 4 5 6

46. Which of the following is NOT a feature of Python?

- (a) Simple syntax
- (b) Platform-independent
- (c) Low-level hardware control
- (d) Large standard library

47. Which Python code checks whether a number is even?

- (a) if num % 2 == 0: print("Even")
- (b) if num / 2 == 0: print("Even")
- (c) if num / 2: print("Even")
- (d) if num * 2: print("Even")

48. What will the following code display? x = 5, y = 2, print(x ** y) (Note: options are hard to read in the scan; please verify)

- (a) 25
- (b) 10
- (c) 7
- (d) 2.5

49. The extension of a Python file is:

- (a) .exe
- (b) .java
- (c) .py
- (d) .cpp

50. What will be the output of the given Python code? print("Hello" + "World")

- (a) Hello World
- (b) HelloWorld
- (c) Hello-World
- (d) Error

51. Which statement will import the math library in Python?

- (a) import maths
- (b) include math
- (c) import math
- (d) load math

52. Which data type is used to store decimal numbers in Python?

- (a) int

- (b) str
- (c) float
- (d) bool

53. What will be the output of the following Python code? `print(5 == 5 and 3 < 2)`

- (a) True
- (b) False
- (c) 1
- (d) 0

54. Which keyword is used in Python for conditional branching?

- (a) for
- (b) if
- (c) while
- (d) switch

55. Which Python code correctly prints numbers from 1 to 10?

- (a) `for i in range(1, 11): print(i)`
- (b) `for i in range(10): print(i)`
- (c) `while i <= 10: print(i)`
- (d) `print(1:10)`

56. What is the primary purpose of Python lists?

- (a) Storing data in a sequence
- (b) Storing data in key: value pairs
- (c) Associating keys with values
- (d) Storing data in an unordered manner

57. Which of the following is NOT a valid Python data type?

- (a) Character
- (b) Float
- (c) Int
- (d) Boolean

58. What does the `len()` function return in Python?

- (a) Largest number in a list.
- (b) Length of an object.
- (c) Data type of a variable.
- (d) Last element of a list.

59. Which built-in function is used to display output in Python?

- (a) output()
- (b) print()
- (c) display()
- (d) show()

60. Consider the code of Python. What will be the output?

```
x = "Python"
```

```
print(x[2])
```

- (a) P
- (b) y
- (c) t
- (d) h

61. What will be the result of the expression in Python? $5 > 3$ and $2 < 1$

- (a) True
- (b) False
- (c) 2
- (d) Error

62. What will the following program print in Python?

```
for i in range(3):
```

```
    print("Hi")
```

- (a) Hi (on one line only once)
- (b) Hi printed 3 times on separate lines
- (c) Error
- (d) 3

63. What will be the output of the Python code?

```
numbers = [2, 4, 6]
```

```
numbers.append(8)
```

```
print(numbers)
```

- (a) [2, 4, 6]
- (b) [2, 4, 6, 8]
- (c) [8, 2, 4, 6]

(d) Error

64. What will the following expression return in Python? "apple" in "Apple"

(a) True

(b) False

(c) Error

(d) "apple"

65. Consider the code in Python. What will be the output?

```
def square(x):
```

```
    return x*x
```

```
print(square(5))
```

(a) 5x5

(b) 25

(c) 10

(d) Error

66. What will be printed by this code in Python?

```
x = [1, 2, 3]
```

```
print(len(x))
```

(a) [1, 2, 3]

(b) 3

(c) 2

(d) Error

67. What will be the output of the following code in Python? print(type(5.0))

(a) <class 'int'>

(b) <class 'float'>

(c) <class 'string'>

(d) <class 'bool'>

68. Which of the following code snippets correctly prints the first element of a list named fruits?

(a) print(fruits[0])

(b) print(fruits[1])

(c) print(fruits(0))

(d) print(fruits.1)
